## WORK EXPERIENCE

### Full Stack Developer

#### Iran Fara Bourse (IFB)

12/2018 - 08/2022

Tehran

##### Achievements/Tasks

- Created a seamless job-seeking system using Bootstrap, featuring responsive pages and efficient data storage to enhance user experience.
- Implemented an issue tracker system, creating both the REST API and user-friendly front-end pages.
- Implemented client-friendly REST APIs in the .NET framework, improving data accessibility and enhancing user experience.
- Created an OTP (One-Time Password) functionality in the frontend of the application.
- Developed backend API for exporting reports, enabling efficient data analysis and utilization.

### Frontend Developer

#### Iran Financial Center (IFC)

12/2016 - 12/2018

Tehran

##### Achievements/Tasks

- Collaborated with the research and design department to create user-friendly web pages.
- Coding and implementing user-friendly web pages by adapting libraries to meet team requirements, ensuring a good user experience across projects.
- Implemented modern web design principles and best practices to create visually appealing and intuitive user interfaces.

## EDUCATION

### Master of Science, Information Technology

#### Qom University

09/2015 - 01/2018

### Bachelor of Science, Computer Science

#### Kharazmi University

09/2008 - 08/2012

## SKILLS

React.js

Node.js

TypeScript

JavaScript

npm

ESLint

Bootstrap

jQuery

CSS

Sass

Git

GitHub

GitLab

Figma

MySQL

MS SQL

MongoDB

Docker

Linux

DevOps

Backstage

Agile Scrum methodology

ASP.NET

CircleCI

CI CD

## PERSONAL PROJECTS

### Self-Study in Web Development (08/2020 - Present)

- **Spotify Clone with React, Redux, and Styled Components.** Created a Spotify clone with React, Redux, and Styled Components, featuring user authentication, a responsive music player, and playlist management. GitHub repository: [elhammmi/Spotify-Clone \(github.com\)](https://github.com/elhammmi/Spotify-Clone).
- **Social Media App with React, Node.js, and MySQL.** Developed a full-stack social media app using React, Node.js, and MySQL. Features include dark mode, user authentication (JWT, cookies), and data management with React Query. GitHub repository: [elhammmi/social-media-app \(github.com\)](https://github.com/elhammmi/social-media-app).

### DevOps Training Program (09/2023 - 10/2023)

- Gained expertise in DevOps, including concepts of monitoring, CI/CD, and blameless retrospectives, enabling the efficient and high-quality delivery of software.
